

Roamer SMART4 LiFePO4 Battery

WARNING
 This is an example schematic provided for guidance only
 Roamer cannot provide advice, or accept any liability for its use
 Danger of fire or electric shock - take appropriate precautions
 Electrics to be fitted by a qualified / competent person
 Equipment must be installed to local regulations and manufacturer recommendations

CABLE AND FUSE SIZING
 All cable sizes assume total cable return length of 0-5m
 You should verify cable and fuse sizes using the manufacturers manual
 Always high quality cable, fuses and switches from reputable brands
 If using a lithium LiFePO4 battery, use a MRBF as main battery fuse
 Make sure that all other parts are sized accordingly eg busbars, switch etc

ROAMER SYSTEM DESIGN
 Roamer provide a design and supply service for UK and European customers
 Includes consultation, wiring diagrams, full parts list, install support and remote config.
 Prices are competitive and we even pricematch Victron parts when needed
 The service is free if you buy a Roamer battery or £120/€150 if not
 The fee is credited back to your invoice if you buy your parts from Roamer
